

## Key Packing and Protection Items Before Delivery

Review Area	What Was Checked	Why It Matters
<b>Thread protector</b>	Pin / box end protection, tightness and visible condition	Reduces thread and shoulder damage during handling
<b>Connection area</b>	Tool joint end, shoulder face and thread condition	Supports rig-site makeup and connection acceptance
<b>Pipe body</b>	Surface condition, marking clarity and end area review	Confirms the pipe is ready for shipment handling
<b>Bundle packing</b>	Strap condition, bundle stability and lifting safety	Reduces movement and impact during transport
<b>Bundle marking</b>	Size, grade, connection, quantity and shipment identity	Helps receiving teams identify cargo quickly
<b>Packing list</b>	Bundle quantity and line item consistency	Keeps shipment documents aligned with physical cargo
<b>Shipment release</b>	Packing, marking and documents reviewed together	Supports overseas delivery and buyer acceptance
